

POSTER PRESENTATION

Objective & Benefits:

The main aspiration is to provide an opportunity to present and discuss the advances in science and technology to the peers and experts in the field during the NMD ATM 2014. Unlike the oral sessions, where the time for interaction is very limited, poster sessions provide an unparalleled opportunity for a one-on-one discussion about the intricacies and achievements of a researcher. Often the discussions at poster sessions lead to establishing new collaborations, finding higher-education opportunities for the students and act as an excellent platform to demonstrate the work to a wide range of audience.

Format of posters:

Maximum acceptable dimensions for posters are 90*120 cm. All posters should contain a clear title and list of contributing authors, along with their affiliations and contact information.

Comment [SK1]: I do not know, if this is a common size in India. I saw on EMSI website 100cm x 100 cm. Request the others to confirm. I am used to printing 3ft x 4ft or 4ft x 4ft!!

Rules:

- All submitted abstracts will be reviewed by the respective session conveners and a decision on the mode of presentation, ORAL or a POSTER presentation will be communicated to the corresponding author(s).
- Decision of the session conveners will be final on the mode of presentation.
- Only one poster per registered participant will be allowed.
- Posters should strictly follow the format mentioned above.
- Participants should remain present during evaluation.
- Judging will be done by a panel of experts chosen by the session conveners.
- The decision of judges will be final and binding to all.
